

PRODUCT INFORMATION

Lime Scale Remover

Descaler for Dishwashing Machines

DESCRIPTION

Lime Scale Remover is an effective descaling agent that may be used in dishwashing machines. The added benefit of Lime Scale Remover is that it may be used for descaling urns and kettles.

FEATURES & BENEFITS

- Very effective lime scale remover;
- Will effectively remove water scale and heat precipitated deposits;
- Contains detergents that will remove light oil contamination;
- Economical concentrate product;
- Does not produce corrosive fumes.

USE DIRECTIONS

Note: Use great care when applying to equipment that contain soft metals and alloys. Lime Scale Remover will also attack concrete.

Dishwasher Descaling: Fill machine. Add 2 litres of Lime Scale Remover into the dishwasher's wash tank. Switch machine to wash cycle. Allow 6 wash cycles then drain and rinse the machine.

Urn & Kettle Descaling: Dilute 150mls of Lime Scale Remover per litre of water. Allow 30-45 minutes contact time. Drain completely and rinse thoroughly with water.
