

PRODUCT INFORMATION

Bleach

Destainer, Whitener, Sanitiser

DESCRIPTION

Bleach is a formulated product designed to kill dangerous bacteria and leave the area smelling clean and fresh. Bleach is the ideal product to use in kitchen, laundries, washrooms and other areas where odours are a concern. Bleach will also work effectively in the removal of mould and moss.

FEATURES & BENEFITS

- Clean fresh fragrance;
- Contains detergent to aid in the removal of dirt;
- A powerful disinfectant that kills the bacteria that emit foul odours;
- Versatile, can be used in bathrooms, kitchens and laundries;
- Biodegradable.

USE DIRECTIONS

Bathrooms: Bleach works effectively in removing stubborn stains, disinfecting and deodorizing the bath, basin, floor, shower recess, tiles, grout and other hard surfaces. Dilute 10-30mls of Bleach per litre of water and apply after washing the area.

Kitchens: Dilute 10-30mls of Bleach per litre of water. This will ensure that food preparation areas and floors will be disinfected. Care must be taken if applying on ALLUMINIUM and SILVER as they may DISCOLOUR.

Laundry: Excellent for whitening whites and disinfecting the wash. Dilute a solution of 10mls per kilo of linen into 2 litres of water and add to the wash. The best option is to add the solution prior to adding linen into the machine or soaker. DO NOT USE on coloured linen, drip dry, silk, woolens, rayon or acetate.

Mould and Moss: Bleach will instantly kill black and green mould found in bathrooms and showers. Bleach will also work effectively in killing Green moss found in damp areas. A solution of 500mls per litre of water will work effectively.
