

PRODUCT INFORMATION

Brakewash

Solvent Brake Cleaner

DESCRIPTION

A highly refined petroleum solvent with a low flash point specifically developed for the preparation of brake cleaning. Brakewash can also be used in cleaning metallic surfaces prior to painting and in particular powder coatings. BrakeWash removes most surface contaminants easily and evaporates very quickly after cleaning.

FEATURES & BENEFITS

- A clear and bright fluid which leaves no stains, residue or lasting odour;
- A high purity product which contains almost no aromatics;
- High Purity – Brakewash is a narrow boiling range solvent;
- Does not contain any appreciable levels of aromatic compounds, rendering surfaces clean and dry in a short time;
- Extremely effective break cleaner;

USE DIRECTIONS

Use as received.
